Overview

Requirements

Monitoring and Enforcement

Recycle Oil

API's Engine Oil Licensing and Certification System (EOLCS) is a voluntary licensing and certification program that authorizes engine oil marketers that meet specified requirements to use the API Engine Oil Quality Marks. Launched in 1993, API's Engine Oil Program is a cooperative effort between the oil and additive industries and vehicle and engine manufacturers Ford, General Motors, and Fiat Chrysler and those represented by the Japan Automobile Manufacturers Association and the Truck and Engine Manufacturers Association. The performance requirements and test methods are established by vehicle and engine manufacturers and technical societies and trade associations such as (ASTM), (SAE), and the American Chemistry Council (ACC).

The Engine Oil Program is backed by monitoring and enforcement program that ensures licensees adhere to program requirements. This includes running physical, chemical, and performance tests on licensed engine oils and verifying that the API-registered Marks are properly displayed on containers and convey accurate information to consumers.

About half of the program's licensees are based in the United States, and the other half are spread around the globe. A complete list of licensees is available on our [licensee directory](#).

Motor Oil Has Mattered For 70 Years.

API Learning

Through multi-platform and multi-media eLearning, API's Training Program offers comprehensive training developed by experts on API Standards and Recommended Practices.

Motor Oil Matters (MOM)

The MOM mark helps customers identify distributors and oil change locations committed to providing motor oil meeting the performance standard recommended by most vehicle and engine manufacturers.

API Compass/Subscriptions

The Compass platform provides organization-wide access to all the API standards and specifications needed to ensure safety, compliance and interoperability.
